

# What are the differences between Center-Based Program Implemented in Alternative Venues (CBPAV) and the Home-Based ECCD Program?

The **CBPAV** is an *emergency response plan of action* to ensure the continuity of learning of 0- to 4-year-old children enrolled in Center-based Programs.

The **Home-based ECCD Program**, is a *long-term alternative delivery mode* for Early Learning Programs, especially in areas where the Child Development Center is inaccessible.

## Status of Child Development Center

**CDC is available, but temporarily inaccessible** due to damage or closure brought by disasters and emergencies

**CDC is not available or inaccessible**

- in areas with no CDC
- in areas with unsafe path/commute to CDC
- by children/parent with disorder/disability
- by IP groups/community residing in geographically isolated and disadvantaged areas
- in areas with congested CDC

## Length of Implementation

**Temporary/ Short-term**

- Program runs in alternative venues (e.g., child's home or temporary learning spaces) while CDCs are still inaccessible
- Classes in CDCs resume after recovery from disaster/emergency; or repair and safety of CDC is ensured

**Long-term**

Program runs for an entire school year
